About the course presenter

Nicholas Krul is a professional business social media trainer and coach, and holds a BSc Zoology degree from the University of Pretoria, with a specialization in Entomology (insects).

He is dad to Riley (14) and Reid (12), who are both homeschoolers.

ECOSYSTEMS

in-person science co-op

We will be studying the Ecosystems unit from The Good and The Beautiful.

Follow this link for the unit sample:

<https://www.goodandbeautiful.com/wp-content/uploads/2023/04/Ecosystems-Combined-Sample.pdf/>

- All lessons will be presented on Google Meet.
- If you join the co-op, you need to commit to 1hr of time per session.
- The point of the co-op is to expose your kids to new and interesting learning opportunities, and build community.
- Each family need to have their own manual which you should buy from the Good and the Beautiful website (\$19.99), and print at home, or have printed.
- Each child will need their own journal. You must purchase the pdf yourself from the Good and the Beautiful website, and print yourself. There are 2 journal options, one for Gr 3-6 (\$9.99) and one for Gr 7-8 (\$9.99).
- There's also a science activity book available for kids from 5-7 years old. This can be used instead of a journal.
- **You must buy and download the PDF student journals and course manual at the following link: <https://www.goodandbeautiful.com/products/ecosystems/> (scroll down to "Buy Downloads")**
- We will suggest a project during this unit. Each child will have the opportunity to present their project at the last session.

Please contact us for any further information.
